

Asteroid Biocare

A soluble concentrate containing 360 g/l glyphosate
 Product Registration Number MAPP 13915

A non-selective systemic weedkiller for control of most annual and perennial weeds
Biodegradable - quickly breaks down in the soil

Children & pets need not be excluded from treated areas once the spray has dried

Asteroid BioCare kills annual and deep rooted perennial weeds, including grasses, Dandelions, Docks, Nettles, Bindweed, Thistles, Brambles and woody weeds. Asteroid BioCare naturally breaks down in the soil without leaving residues. Being systemic, Asteroid Biocare is absorbed by the leaves and distributed throughout the weed, reaching right down to the roots.

IMPORTANT INFORMATION

FOR USE ONLY AS A HOME GARDEN WEEDKILLER

Maximum individual dose: 0.7 ml product per m²

For use on unwanted vegetation

TO AVOID RISKS TO MAN AND THE ENVIRONMENT, COMPLY WITH THE INSTRUCTIONS FOR USE

SAFETY INSTRUCTIONS

Protection during use:

KEEP OFF SKIN.
 WASH OFF SPLASHES IMMEDIATELY.
 WASH HANDS AND EXPOSED SKIN AFTER USE.

Environmental protection:

Do not contaminate water with the product or its container. Do not empty into drains.
 Direct spray away from water. Do not contaminate ponds and streams.

Storage and disposal:

KEEP AWAY FROM CHILDREN AND PETS.
 KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed, in a safe place.
 Dispose of unused product in its container at a household waste site (civic amenity site). Contact your local council (local authority) for details. Dispose of empty container in the dustbin.

KEEP CONTAINER UPRIGHT.
 PROTECT FROM FROST.

CONTENTS: 1 LITRE e
 (Treats up to 3,000 m²)

Batch No: See bottle cap Made in Denmark

Approval holder: Cheminova A/S, DK7620 Lemvig, Denmark.

Asteroid Biocare

INSTRUCTIONS FOR USE

WHEN TO USE: For best effects apply to weeds that have adequate leaf area to absorb the spray when they are actively growing. Rain within 6 hours of spraying can reduce effectiveness and repeat treatment may be necessary. Always spray in calm conditions.

Established perennial weeds should be treated at the start of flowering for best results. Spray Nettles and Ground-elder when new leaves have unfolded fully in late spring. Weeds may show first effects from a few days up to 4 weeks after treatment, depending on the weather and the type of weed. Once the weeds have died, they can be dug into the soil or removed and the area treated can be immediately re-planted or sown with seed. Persistent weeds may require repeat treatment, if new growth appears.

HOW AND WHERE TO USE:

Use a watering can with a fine rose or a sprayer to lightly wet the leaves, but avoid run-off of the liquid. Take extreme care to avoid spray drift as this can severely damage or destroy neighbouring plants. Do not use on lawns.

Using a watering can:

1. For annual weeds e.g. Speedwell, Chickweed and Annual Meadow-grass mix 10 mls of Asteroid BioCare into 5 litres of water and apply over 30 m².
2. For perennial grasses (including Common Couch) and perennial broad-leaved weeds e.g. Bindweed, Dandelions, Docks, Ground-elder and Thistles mix 15 mls of Asteroid BioCare into 5 litres of water and apply over 30 m².
3. For woody weeds e.g. Brambles, mix 20 mls of Asteroid BioCare into 5 litres of water and apply over 30 m².

Using a sprayer:

1. For annual weeds e.g. Speedwell, Chickweed and Annual Meadow-grass mix 10 mls of Asteroid BioCare into 1 litre of water and apply over 30 m².
2. For perennial grasses (including Common Couch) and perennial broad-leaved weeds e.g. Bindweed, Dandelions, Docks, Ground-elder, and Thistles mix 15 mls of Asteroid BioCare into 1 litre of water and apply over 30 m².
3. For woody weeds e.g. brambles, mix 20 mls of Asteroid BioCare into 1 litre of water and apply over 30 m².

Measuring:

Loosen the chamber cap slightly and gently squeeze the bottle to fill the measuring chamber to the required level. Remove the chamber cap and pour the measured quantity into the watering can or sprayer. Replace the chamber cap firmly after use.

After use:

After application, thoroughly rinse the sprayer or watering can three times, pouring the rinsing water over bare ground. Do not empty rinsing water into drains or soakaways. Do not walk into treated areas until the product has dried.
