

Mossgard™

A deterrent for moss growth

LIQUID

Contains 30g/L Chelated Iron, 70g/L Copper in a NON-Staining formulation and environmentally benign penetrants.

- Provides Amenity areas with foliar and root-absorbed Iron and Copper
- Has been observed to reduce Moss infestations
- Should be used as part of a programme of treatments

Mossgard Should be applied to areas requiring treatment for Iron and Copper only by qualified personnel.

Directions for use:

Mossgard should be applied as advised by a competent agronomist to comply with health and safety legislation to supply Iron and Copper and stop the build up of mosses.

For best results make at least two applications, one month apart

Apply Mossgard at the rate of 0.3lt per 30lts of water to treat 500 square metres.

Initially half fill the sprayer followed by the required amount of Mossgard and then complete filling.

Agitate throughout the spraying operation. When complete refill the tank with clean water and empty to rinse out.

Safety Precautions:

Use in accordance with COSHH assessment when handling chemical or exposed to spray.

R22 Harmful if swallowed
R36/38 Irritating to eyes/skin
S2 Keep out of reach of children
S20/21 When using do not eat, drink or smoke
S25 Avoid contact with eyes
Protect from frost
