TURF FERTILISERS

Sinclair offers a comprehensive range of specially formulated turf fertilisers which supply all the nutrients needed for healthy growth, strong root development and improved colour and texture across all types of turf. If weeds or moss are present the initial or second spring or summer fertiliser application can be replaced with a lawn food with weedkillers and/or mosskiller. There is a choice of mini-granular or powder formulations. The products can be used with all application equipment.
