

**DUET MAX** from  
(MAPP 14802)

## The management tool for amenity grass.

Managing your grass just got easier. Duet Max is a plant growth regulator specifically designed to control the growth of your grass. One application can growth, a number of other benefits accrue:

- **Nutrients are diverted to roots** for improved root growth and increased lateral stem development. This leads to a thicker, healthier sward better able to withstand extremes of temperature, water availability, wear and tear.
- **Reduced mowing!** Save man-hours, fuel consumption and wear and tear on machinery (less frequent sharpening). Reduce the time spent trying to access difficult areas such as slopes.
- **Reduced edging.** Reduced grass growth means that the edges of paths and flower borders stay neat for longer.

**Statutory limitations:** Duet Max is approved for use on amenity grassland and managed amenity turf – golf greens and tees, fairways, rough and semi-rough areas and sports pitches. Maximum individual dose 3.2 L/ha; Maximum total dose 16.0 L/ha/year. No limitation on time of application.

**Suggested programmes:** Treatment is best started when the first flush of vigorous grass growth starts in the spring, usually mid-April.

Situation	Mowing height	Dose rate	Frequency of application
Golf greens:	7mm or less	0.4 L/ha	Every 3 – 4 weeks
Golf tees:	10 mm	0.8 L/ha	Every 4 – 8 weeks
	18 mm	1.6 L/ha	
Golf fairways and amenity grass:	12 mm	0.8 L/ha	Every 3 – 4 weeks
	>18 mm	1.6 L/ha	Every 4 – 8 weeks
Rough & semi-rough grass	> 18 mm	2.4 – 3.2L/ha*	Every 5 – 8 weeks
Winter sports pitches	>10 mm	0.8 L/ha	
	>18 mm	1.6 L/ha**	

\* Use 2.4 L/ha for fine turf mixtures; increase dose up to 3.2 L/ha for predominantly perennial ryegrass swards.

\*\* Use 0.8 L/ha for first application of the year; Increase maintenance dose to 3.2 L/ha where grass is very vigorous.

### **ALWAYS READ THE LABEL. USE PESTICIDES SAFELY**

Duet Max contains 121 g/l trinexapac-ethyl as an emulsifiable concentrate formulation
