

Product information

Granule

Itemcode: 16876

PRODUCT DESCRIPTION

Scotts H₂Pro Granule is a wetting and water conservation agent for use in treating dry patch (localized dry spot) and reducing the irrigation requirement of soils. The product has both a preventative and curative effect on dry patch by reducing the number of wet/dry cycles in the soil preventing the hardening of water repellent deposits.

PRODUCT DESCRIPTION

1. Significantly reduces irrigation requirements.
2. Unique curative and preventative action against Dry Patch (localized Dry Spot).
3. Effective through the rootzone and not just at the surface.
4. Excellent spreading and penetration characteristics.
5. Flexible application programmes and flexible water rates.

PRODUCT CHARACTERISTICS

Bag size:	10 kg
Application rate:	20 g/m ²
Bag coverage:	500 m ²
Granule size:	0.6-1.3 mm
Granule count:	1100-1600 granules/gram

STORAGE

Keep away from heat and sources of ignition. Keep away from food, drink and animal feeding stuffs. For quality reasons: Keep out of reach of direct sunlight, store under dry conditions, partly used bags should be closed well. Keep at temperatures between 0 °C and 40 °C.

DIRECTIONS FOR USE

- Best performance achieved when applied in a programmed approach.
- Works most effectively when the initial application is applied before the growing season with further applications as per the selected application program.
- Can also be used curatively to relieve plant stress due to hydrophobic soil conditions at any time of the year.
- Apply granules using Scotts pedestrian spreaders.
- Watering-in after application will aid penetration of wetting agent into the soil and improve efficacy.
- Penetration of the wetting agent and be further enhanced if applied following aeration programmes such as hollow tining, slitting and/or scarification.

HEALTH & SAFETY

A Material Safety Data Sheet is available on request.
