Multi-purpose Weedkiller, kills annual and deep rooted perennial weeds, including grasses, dandelions, docks, nettles, bindweed and thistles. WEEDWALLOP ready to use Weedkiller is inactivated immediately on contact with soil and biodegrades, leaving no soil residues. **DO NOT USE ON LAWNS.**

INSTRUCTIONS FOR USE

It is recommended to wear gloves and gardening footwear.
Do not treat near drains, wells or water courses and avoid run-off.

HOW TO USE

- Shake well before use.
- Follow container assembly instructions
- Rotate nozzle to spray position. Hold the sprayer approx 50 cm away from the target weed and spray to lightly wet the weeds – avoid run-off.
- Rotate nozzle to stop after use.

WHEN TO USE

- Spray at any time when the weeds are actively growing and have adequate leaf area to absorb the spray. Apply in calm conditions to avoid drift onto cultivated plants.
- Rain within 6 hours reduces effectiveness and repeat treatment may be necessary.
- Treat established perennial weeds at the start of flowering to give best results.
- Spray nettles and ground elder when new leaves have unfolded fully in late spring.
- Weeds may show first effects from a few days up to 4 weeks, depending on the weather and the type of weed.
- Leave weeds 7 days before digging or cultivation, for the Weedkiller to move to the roots.
- Repeat application if necessary, should new growth appear.

WARNING

- Avoid contact by spray and spray drift with cultivated plants and desired vegetation. Do not use on Lawns unless you want to kill the grass.
- To avoid transfer to lawns and other desired vegetation do not walk into treated areas until the product has dried.
- Do not reuse the empty bottle.

STATUTORY CONDITIONS RELATING TO USE

FOR USE ONLY AS A HOME AND GARDEN WEEDKILLER / HERBICIDE

For use on unwanted vegetation, land not intended to bear vegetation.

READ ALL SAFETY INSTRUCTIONS BEFORE USE.

TO AVOID RISKS TO MAN AND THE ENVIRONMENT, COMPLY WITH THE INSTRUCTIONS FOR USE.
