A1Lawn Ultimate Lawn Seaweed Extract

500ml (covers 100m²)

Key benefits:

An ideal follow-up treatment after fertilising. Boosts root development, improves disease and stress resistance.

How to apply:

Mix 50ml with 2.5L of water to cover 10m².

Apply using a handheld pressure sprayer or watering can with a fine rose head.

Safe to apply every 2 weeks.

Apply from March - May

Energise G Soil Conditioner

2kg (covers 100m²)

Key benefits:

Humic acids help roots absorb water and nutrients more efficiently. Carbon helps break down excess thatch and improves soil structure.

How to apply:

Apply at 20g/m² as a topdressing prior to your fertiliser application.

If you're planning to sow any seed this Spring, Energise G is idea to add to the soil surface before seeding.

Apply between March and September

A1Lawn Ultimate Spring & Summer Lawn Fertiliser

2.5kg (covers up to 100m²)

Key benefits:

Keeps the lawn a rich, vibrant green and improves stress and disease resistance.

How to apply:

Spread evenly at 25g/m², using a spreader for the best coverage (hand application is fine - just keep it even).

Apply before rain so the granules wash into the soil. If no rain falls within 24 hours, water daily until the granules dissolve to prevent scorching.

Apply from April - May
