GENERAL NOTICE 2

GENERAL: ACTIVATOR 90 is a low-foaming, non-ionic type spreader adjuvant. ACTIVATOR 90 provides quick wetting, more uniform distribution, and increases retention of spray by reducing surface tension of the spray droplets. ACTIVATOR 90 is a water soluble adjuvant that may also be used as an interfacing agent for wettable powders. Variations in conditions of use can cause some variation in the amount of ACTIVATOR 90 required. The minimum required to give a smooth, uniform coverage usually gives the most effective results.

GENERAL NOTICE 3

MIXING INSTRUCTIONS: For wettable powders and water soluble materials, add ACTIVATOR 90 in water before adding pesticide to spray tank. For emulsifiable products, add ACTIVATOR 90 after a good emulsion is formed.

GENERAL NOTICE 4

THIS PRODUCT CAN BE USED IN THE FOLLOWING SETTINGS: AGRICULTURAL, AQUATIC, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, ORNAMENTAL, RIGHTS-OF-WAY AND TURF.
