

# AMVISTA G4 TURF RISE 20KG (10-2-2+8FE) CLASSIC FEED, WEED & MOSS KILLER

## Please read before use:

This product you have purchased is of high quality and made from quality raw materials. Used according to label instructions, you can expect that it will feed your lawn with balanced nutrients, effectively kill Moss, (which will blacken and then require raking or scarifying out) kill many broad leaf weeds (see label list).

However, it's important that you are aware, that from time to time due to environmental conditions, some species of weeds (including, but not exclusively, clover and creeping buttercup) won't be killed as desired. In hot and prolonged dry conditions, the plant shuts down and the herbicides are not translocated into the roots. Waterlogged conditions may also adversely affect the efficiency of this product. A second application (within label instructions) can sometimes but not always rectify this. In severely weeded infected lawns additional herbicides may be required to gain desired results.

Please also observe the following **Do's and Don'ts** when using the product thank you.

DO's	DON'Ts
Read the instructions on the label	Ignore those instructions
Stick to application rates	Ignore them
Only apply between May - August	Apply at other times
