SAFETY DATA SHEET

4521, GLYPHOSATE 360 g/l SL

Revision: Sections containing a revision or new information are marked with a ♦.

♦ SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. **Product identifier** ........................... GLYFOS GOLD 4521, GLYPHOSATE 360 g/l SL

1.2. **Relevant identified uses of the substance or mixture and uses advised against** ............................ Can be used as herbicide only.

1.3. **Details of the supplier of the safety data sheet** CHEMINOVA A/S, a subsidiary of FMC Corporation Thyborønvej 78 DK-7673 Harboøre Denmark SDS.Ronland@fmc.com

1.4. **Emergency telephone number**

   **Company** ................................ (+45) 97 83 53 53 (24 h; for emergencies only)

   **Medical emergencies:**  
   Austria: +43 1 406 43 43  
   Belgium: +32 70 245 245  
   Bulgaria: +359 2 9154 409  
   Cyprus: 1401  
   Czech Republic: +420 224 919 293  
   +420 224 915 402  
   Denmark: +45 82 12 12 12  
   France: +33 (0) 1 45 42 59 59

   U.S.A. & Canada: +1 800 / 331-3148 (PROSAR)  
   All other countries: +1 651 / 632-6793 (PROSAR - Collect)

SECTION 2: HAZARDS IDENTIFICATION

2.1. **Classification of the substance or mixture** .............................. None
WHO classification ........................ Class U (Unlikely to present acute hazard in normal use)

Health hazards .............................. The product has mildly irritating properties.

Environmental hazards ....................... The product is a herbicide and is therefore expected to be harmful to all green plants.

2.2. Label elements

According to EU Reg. 1272/2008 as amended

Product identifier .......................... 4521, Glyphosate 360 g/l SL

Hazard pictograms .......................... None

Signal word ............................... None

Hazard statements .......................... None

Precautionary statements ................. None

Supplementary hazard statements
EUH210 ...................................... Safety data sheet available on request.
EUH401 ...................................... To avoid risks to human health and the environment, comply with the instructions of use.

2.3. Other hazards .......................... None of the ingredients in the product meets the criteria for being PBT or vPvB.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substances ............................. The product is a mixture, not a substance.

3.2. Mixtures ............................... See section 16 for full text of hazard statements.

Active ingredient .......................... Glyphosate, in the form of its isopropylamine salt

The product contains 486 g/l of the pure active ingredient glyphosate as its isopropylamine salt, equivalent to 360 g/l of the free acid glyphosate.

Glyphosate ................................. Content: 31% by weight

CAS name ................................. Glycine, N-(phosphonomethyl)-

CAS no. ..................................... 1071-83-6

IUPAC name(s) ............................. N-(Phosphonomethyl)glycine

ISO name/EU name ....................... Glyphosate

EC no. (EINECS no.) ....................... 213-997-4

EU index no. ............................... 607-315-00-8

Classification of the ingredient ....... Eye damage: Category 1 (H318)

Hazards to the aquatic environment, chronic: Category 2 (H411)

Structural formula ........................

\[ \text{HOOCCH}_2\text{NHCH}_2\text{P} \text{OH} \]

\[ \text{OH} \]
**Material group**: 45I/4521  
**Product name**: Glyfos Gold  
**Content**: 42% by weight

**CAS name**: Glycine, N-(phosphonomethyl)-, compd. with 2-propanamine (1:1)  
**CAS no.**: 38641-94-0  
**IUPAC name**: N-(phosphonomethyl)glycine, compound with 2-propylamine (1:1)  
**EU name**: Glyphosate isopropylamine salt  
**Common name**: Glyphosate isopropylammonium  
**Other name(s)**:  
**EC no. (EINECS no.)**: 254-056-8  
**EU index no.:** 015-184-00-8  
**Classification of the ingredient**: Hazards to the aquatic environment, chronic: Category 2 (H411)  
**Structural formula**:  

![Structural formula](image)

**SECTION 4: FIRST AID MEASURES**

4.1. **Description of first aid measures**

**Inhalation**

If experiencing any discomfort, immediately remove from exposure. Light cases: Keep person under surveillance. Get medical attention immediately if symptoms develop. Serious cases: Get medical attention immediately or call for an ambulance.

**Skin contact**

Remove contaminated clothing and footwear. Flush skin with water. Wash with water and soap. See physician if irritation develops.

**Eye contact**

Immediately rinse eyes with much water or eyewash solution, occasionally opening eyelids, until no evidence of chemical remains. Remove contact lenses after a few minutes and rinse again. Get medical attention immediately.

**Ingestion**

Immediately rinse mouth and drink milk or water. Do not induce vomiting. If vomiting does occur, rinse mouth and drink fluids again. Call a doctor or get medical attention.

4.2. **Most important symptoms and effects, both acute and delayed**

Primarily irritation.
4.3. **Indication of any immediate medical attention and special treatment needed**

Immediate medical attention is required in case of eye contact.

**Note to physician**

The irritating effects of this product can be treated as usual against effects of acids or acid fumes. Probable mucosal damage may contraindicate the use of gastric lavage.

---

**SECTION 5: FIRE-FIGHTING MEASURES**

5.1. **Extinguishing media**

Dry chemical or carbon dioxide for small fires, water spray or foam for large fires. Avoid heavy hose streams.

5.2. **Special hazards arising from the substance or mixture**

The essential breakdown products are carbon monoxide, carbon dioxide, phosphorus pentoxide and nitrogen oxides.

5.3. **Advice for firefighters**

Use water spray to keep fire-exposed containers cool. Approach fire from upwind to avoid hazardous vapours and toxic decomposition products. Fight fire from protected location or maximum possible distance. Dike area to prevent water runoff. Firemen should wear self-contained breathing apparatus and protective clothing.

---

**SECTION 6: ACCIDENTAL RELEASE MEASURES**

6.1. **Personal precautions, protective equipment and emergency procedures**

It is recommended to have a predetermined plan for the handling of spills. Empty, sealable vessels (not metal) for the collection of spills should be available.

In case of large spill (involving 10 tonnes of the product or more):
1. use personal protection equipment; see section 8
2. call emergency telephone no.; see section 1
3. alert authorities.

Observe all safety precautions when cleaning up spills. Use personal protection equipment. Depending on the magnitude of the spill this may mean wearing respirator, face mask or eye protection, chemical resistant clothing, gloves and boots.

Stop the source of the spill immediately if safe to do so. Avoid and reduce mist formation as much as possible. Personal exposure by splashing must be avoided.

6.2. **Environmental precautions**

Contain the spill to prevent any further contamination of surface, soil or water. Wash waters must be prevented from entering surface water drains. Uncontrolled discharge into water courses must be alerted to the appropriate regulatory body.

6.3. **Methods and materials for containment and cleaning up**

It is recommended to consider possibilities to prevent damaging effects of spills, such as bunding or capping. See GHS (Annex 4, Section 6).
If appropriate, surface water drains should be covered. Minor spills on the floor or other impervious surface should be absorbed onto an absorptive material such as universal binder, hydrated lime, bentonite, attapulgite or other absorbent clays. Collect the contaminated absorbent in suitable containers. Clean area with detergent and rinse with water. Absorb wash liquid with absorbent and transfer to suitable containers. The used containers should be properly closed and labelled.

Large spills which soak into the ground should be dug up and transferred to suitable containers.

Spills in water should be contained as much as possible by isolation of the contaminated water. The contaminated water must be collected and removed for treatment or disposal.

6.4. **Reference to other sections**

See subsection 8.2. for personal protection.

See section 13 for disposal.

---

**SECTION 7: HANDLING AND STORAGE**

7.1. **Precautions for safe handling**

In an industrial environment it is recommended to avoid all personal contact with the product, if possible by using closed systems with remote system control. The material should be handled by mechanical means as much as possible. Adequate ventilation or local exhaust ventilation is required. The exhaust gases should be filtered or treated otherwise. For personal protection in this situation, see section 8.

For its use as a pesticide, first look for precautions and personal protection measures on the officially approved label on the packaging or for other official guidance or policy in force. If these are lacking, see section 8.

Avoid contact with eyes, skin or clothing. Avoid breathing vapour or spray mist. Wash thoroughly after handling. Remove contaminated clothing immediately. Then wash thoroughly and put on clean clothing.

The product or its spray solutions should be stored in stainless steel, aluminium, fiberglass, plastic or plastic-lined containers only. See subsection 10.5.

Do not discharge to the environment. Do not contaminate water when disposing of equipment wash waters. Collect all waste material and remains from cleaning equipment, etc., and dispose of as hazardous waste. See section 13 for disposal.

7.2. **Conditions for safe storage, including any incompatibilities**

The product is stable under normal conditions of warehouse storage.
Store in closed, labelled containers. The storage room should be constructed of incombustible material, closed, dry, ventilated and with impermeable floor, without access of unauthorised persons or children. The room should only be used for storage of chemicals. Food, drink, feed and seed should not be present. A hand wash station should be available.

7.3. Specific end use(s) ....................

This product is a registered pesticide, which may only be used for the applications it is registered for, in accordance with a label approved by the regulatory authorities.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Control parameters ......................

To our knowledge, personal exposure limits have not been established for glyphosate or any other component in this product. However, personal exposure limits defined by local regulations may exist and must be observed.

Glyphosate free acid
DNEL, systemic ......................... 0.2 mg/kg bw/day
PNEC, aquatic .......................... 0.028 mg/l

8.2. Exposure controls ....................... When used in a closed system, personal protection equipment will not be required. The following is meant for other situations, when the use of a closed system is not possible, or when it is necessary to open the system. Consider the need to render equipment or piping systems non-hazardous before opening.

The precautions mentioned below are primarily meant for handling of the undiluted product and for preparing the spray solution, but can be recommended for spraying as well.

Respiratory protection The product is not likely to present an airborne exposure concern during normal handling, but in the event of an accidental discharge of the material which produces a heavy vapour or mist, workers must put on officially approved respiratory protection equipment with a universal filter type including particle filter.

Protective gloves ..... Wear heavy duty, natural rubber gloves. The breakthrough times of these gloves for glyphosate are unknown, but it is expected that they will give adequate protection. It is recommended to limit the work to be done manually.

Eye protection ......... Wear safety glasses, goggles or face shield. It is recommended to have an eye wash fountain immediately available in the workplace when there is a potential for eye contact.
Other skin protection

- Wear appropriate chemical resistant clothing to prevent skin contact depending on the extent of exposure. During most normal work situations where exposure to the material cannot be avoided for a limited time span, waterproof pants and apron of chemical resistant material or coveralls of polyethylene (PE) will be sufficient. Coveralls of PE must be discarded after use if contaminated. In cases of excessive or prolonged exposure, coveralls of barrier laminate may be required.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on physical and chemical properties

- **Appearance**: Yellow liquid
- **Odour**: Slight amine-like odour
- **pH**: 1% solution in water: 5.1 at 25°C
- **Melting point/freezing point**: Below 0°C
- **Initial boiling point and boiling range**: Above 100°C
- **Flash point**: Above 100°C
- **Evaporation rate**: Not determined
- **Flammability (solid/gas)**: Not applicable (liquid)
- **Upper/lower flammability or explosive limits**: Not determined
- **Vapour pressure**: For glyphosate free acid: 1.31 x 10^{-5} Pa at 25°C
- **Vapour density**: Not determined
- **Relative density**: Not determined
- **Density**: 1.169 g/cm³ at 20°C
- **Solubility**: Solubility of glyphosate isopropylamine salt at 20°C in dichloromethane: 0.184 g/l, methanol: 15.88 g/l
- **Partition coefficient n-octanol/water**: Glyphosate free acid: log K_{ow} = -3.3
- **Autoignition temperature**: Not determined
- **Decomposition temperature**: Not determined
- **Viscosity**: 24.6 mPa.s at 25°C, 11.9 mPa.s at 45°C
- **Explosive properties**: Not explosive
- **Oxidising properties**: Not oxidising

9.2. Other information

- **Miscibility**: The product is miscible with water.

SECTION 10: STABILITY AND REACTIVITY

10.1. Reactivity

- To our knowledge, the product has no special reactivities.

10.2. Chemical stability

- The product is stable during normal handling and storage at ambient temperatures.

10.3. Possibility of hazardous reactions

- None known
### 10.4. Conditions to avoid

Heating of the product will produce harmful and irritant vapours.

### 10.5. Materials to avoid

Do not store or mix this product in galvanised or unlined steel containers. Stainless steel may be used. The product or its spray solutions may react with such containers to produce hydrogen gas which could flash or explode if ignited.

### 10.6. Hazardous decomposition products

See subsection 5.2.

---

**SECTION 11: TOXICOLOGICAL INFORMATION**

**11.1. Information on toxicological effects**

* = Based on available data, the classification criteria are not met.

**Product**

Acute toxicity ........................................ The product is practically non-toxic. * However, it should always be treated with the usual care of handling chemicals.

No significant adverse health effects are expected if only small amounts (less than a mouthful) are swallowed. Ingestion of similar formulations has been reported to produce gastrointestinal discomfort with nausea, vomiting and diarrhoea. Ingestion of large quantities of a similar product has been reported to result in hypotension and lung oedema.

The acute toxicity, as measured on a similar product, is:

- **Route(s) of entry**
  - ingestion $L_D^{50}$, oral, rat: $> 5000$ mg/kg (method OECD 401)
  - skin $L_D^{50}$, dermal, rat: $> 2000$ mg/kg (method OECD 402)
  - inhalation $L_C^{50}$, inhalation, rat: $> 4.72$ mg/l/4 h (method OECD 403)
  - no signs of toxicity at this concentration

- **Skin corrosion/irritation**
  - not irritating to skin (measured on a similar product; method OECD 404).

- **Serious eye damage/irritation**
  - not irritating to eyes (measured on a similar product; method OECD 405).

- **Respiratory or skin sensitisation**
  - not sensitising (measured on a similar product; method OECD 406).

- **Germ cell mutagenicity**
  - The product contains no ingredients known to be mutagenic.

- **Carcinogenicity**
  - The product contains no ingredients known to be carcinogenic.

- **Reproductive toxicity**
  - The product contains no ingredients known to have adverse effects on reproduction.

- **STOT – single exposure**
  - To our knowledge, no specific effects have been observed after single exposure.
The following has been measured on the active ingredient glyphosate:

STOT – repeated exposure

In long-term studies with glyphosate free acid, the first minor effects (body weight and liver weight changes) were noted in rats at exposure levels of 60 - 100 mg glyphosate/kg bw/day. No signs of toxicity were found at any level, including the highest exposure level of 4800 mg glyphosate/kg bw/day. *

Aspiration hazard

The product does not present an aspiration hazard. *

Symptoms and effects, acute and delayed

Primarily irritation.

**Glyphosate isopropylamine salt**

Acute toxicity

The substance is practically non-toxic. *

The acute toxicity of the substance is measured as:

- **Ingestion**: LD_{50}, oral, rat: > 2000 mg/kg (method FIFRA 81.01)
- **Skin**: LD_{50}, dermal, rat: > 4000 mg/kg (method FIFRA 81.02)
- **Inhalation**: LC_{50}, inhalation, rat: > 4.72 mg/l/4 h (method FIFRA 81.03) (no signs of toxicity at this concentration)

Skin corrosion/irritation

Not irritating to skin (method FIFRA 81.05). *

Serious eye damage/irritation

Not irritating to eyes (method FIFRA 81.04). *

Respiratory or skin sensitisation

Not sensitising (method FIFRA 81.06). *

**Glyphosate**

Toxicokinetics, metabolism and distribution

After oral intake, glyphosate is rapidly absorbed but only to a limited extent (approx. 30%). Metabolism is very limited and excretion is rapid and nearly complete. Distribution is generally low with residues occurring in all tissues. There is no evidence of accumulation.

Acute toxicity

The substance is practically non-toxic. * The acute toxicity of the substance is measured as:

- **Ingestion**: LD_{50}, oral, rat: > 5000 mg/kg (method OECD 401)
- **Skin**: LD_{50}, dermal, rat: > 2000 mg/kg (method OECD 402)
- **Inhalation**: LC_{50}, inhalation, rat: > 5 mg/l/4 h (method OECD 403) (no signs of toxicity at this concentration)

Skin corrosion/irritation

Not irritating to skin (method FIFRA 81.05). *

Serious eye damage/irritation

Irritating to eyes (method FIFRA 81.04).

Respiratory or skin sensitisation

Not sensitising (method OECD 406). No allergic effects on humans have been reported. *
Carcinogenicity .......................... No indications of carcinogenic effects were found in 8 studies on glyphosate and no study on glyphosate itself has shown possible carcinogenic effects.

**SECTION 12: ECOLOGICAL INFORMATION**

12.1. **Toxicity** ............................. The product is a herbicide and therefore expected to be toxic to all green plants. It does not meet the criteria for being harmful to aquatic plants. The product is not considered as harmful to fish, aquatic invertebrates, birds and soil micro- and macroorganisms.

The ecotoxicity of the product is measured as:

- **Fish**  
  Rainbow trout (*Oncorhynchus mykiss*) ................................. 96 h- LC₅₀: > 1000 mg/l
- **Invertebrates**  
  Daphnids (*Daphnia magna*) .................................................. 48 h-EC₅₀: > 1000 mg/l
- **Algae**  
  Green algae (*Pseudokirchneriella subcapitata*) ............... 72-h IC₅₀: 189 mg/l

The following has been measured on a similar but more concentrated product:

- **Plants**  
  Duckweed (*Lemma gibba*) ...................................................... 7-day NOEC: 3.19 mg/l
- **Birds**  
  Japanese quail (*Coturnix coturnix japonica*) ...................... LD₅₀: > 3340 mg/kg
- **Earthworms**  
  Eisenia foetida ................................................................. 14-day LD₅₀: > 10000 mg/kg soil
- **Bees**  
  Honeybee (*Apis mellifera africanised*) .............................. LD₅₀, acute oral: > 100 μg/bee

12.2. **Persistence and degradability** .... **Glyphosate** is not readily biodegradable. It undergoes slow degradation in the environment and in waste water treatment plants. No adverse effects are found at concentrations up to 100 mg/l in waste water treatment plants. Degradation is mainly microbiological and aerobic, but anaerobic degradation does also occur.

Primary degradation half-lives in the environment vary much with circumstances, but are usually around 3 - 30 days in aerobic soil and water.

The product contains minor amounts of not readily biodegradable ingredients, which may not be degradable in a waste water treatment plant.

12.3. **Bioaccumulative potential** ........ See section 9 for octanol-water partition coefficient. **Glyphosate** is not expected to bioaccumulate. In several studies on bioaccumulation of glyphosate, both in marine and freshwater systems, only low bioaccumulation factors were found.

12.4. **Mobility in soil** ............................. In the environment **glyphosate** is not mobile, but is rapidly deactivated by adsorption to clay particles. Glyphosate binds strongly to soil.
12.5. **Results of PBT and vPvB assessment**  
The substance does not meet the criteria for being PBT or vPvB.

12.6. **Other adverse effects**  
Other relevant hazardous effects in the environment are not known.

**SECTION 13: DISPOSAL CONSIDERATIONS**

13.1. **Waste treatment methods**  
Remaining quantities of the material and empty but unclean packaging should be regarded as hazardous waste.

Disposal of waste and packagings must always be in accordance with all applicable local regulations.

Disposal of product  
According to the Waste Framework Directive (2008/98/EC), possibilities for reuse or reprocessing should first be considered. If this is not feasible, the material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing.

Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

Disposal of packaging  
It is recommended to consider possible ways of disposal in the following order:
1. Reuse or recycling should first be considered. Reuse is prohibited except by the authorisation holder. If offered for recycling, containers must be emptied and triply rinsed (or equivalent). Do not discharge rinsing water to sewer systems.
2. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.
3. Delivery of the packaging to a licensed service for disposal of hazardous waste.
4. Disposal in a landfill or burning in open air should only occur as a last resort. For disposal in a landfill containers should be emptied completely, rinsed and punctured to make them unusable for other purposes. If burned, stay out of smoke.

**SECTION 14: TRANSPORT INFORMATION**

**ADR/RID/IMDG/IATA/ICAO classification**

14.1. **UN number**  
Not classified as hazardous material for transport

14.2. **UN proper shipping name**  
Not applicable

14.3. **Transport hazard class(es)**  
Not applicable

14.4. **Packing group**  
Not applicable
14.5. **Environmental hazards** ............
The product may be harmful in the environment.

14.6. **Special precautions for user** ........
Avoid any unnecessary contact with the product. Misuse can result in damage to health. Do not discharge to the environment.

14.7. **Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code** ................
The product is not transported in bulk by ship.

### SECTION 15: REGULATORY INFORMATION

15.1. **Safety, health and environmental regulations/legislation specific for the substance or mixture**
To our knowledge, no specific regulations apply.

All ingredients are covered by EU chemical legislation.

15.2. **Chemical safety assessment** ........
A chemical safety assessment is not required to be included for this product.

References ................................ Data measured on this and a similar formulation and acute toxicity data measured on the active ingredient are unpublished company data. Other data for glyphosate are taken from the EU evaluation of the substance.

Method for classification ............ Test data

Used hazard statements ..............
- H302 Harmful if swallowed.
- H314 Causes severe skin burns and eye damage.
- H318 Causes serious eye damage.
- H411 Toxic to aquatic life with long lasting effects.
- EUH210 Safety data sheet available on request.
- EUH401 To avoid risks to human health and the environment, comply with the instructions of use.

Advice on training .................... This material should only be used by persons who are made aware of its hazardous properties and have been instructed in the required safety precautions.

The information provided in this safety data sheet is believed to be accurate and reliable, but uses of the product vary and situations unforeseen by FMC Corporation may exist. The user has to check the validity of the information under local circumstances.

Prepared by: FMC Corporation / Cheminova A/S / GHB
