

Vitax Q4 Plus contains mycorrhizal fungi, helpful bacteria and a range of biostimulants to encourage rapid root growth and early establishment. The organic nutrients and trace elements promote vigorous plant growth, abundant flowering and ripening of fruit. Use when planting roses, trees and shrubs.

HOW TO USE

Apply evenly, preferably when the soil is moist. Lightly hoe into the top surface of the soil, and in dry conditions, water in.

ROSES, TREES & SHRUBS: For containers or bare rooted stock, sprinkle part of the sachet into the bottom of the planting hole and lightly fork in. Mix the rest with the fill-in soil and firm in the plant.

Annual Top Dressing: In the spring following planting, sprinkle Q4 Plus evenly under the branches and lightly fork in.

FLOWERS AND VEGETABLES: Use 15 g per linear metre before sowing and planting. Top dress vegetables at 60 g/m² once or twice during the summer months.

TOMATOES AND CHRYSANTHEMUMS: Apply 30 g/m² as a regular feed at monthly intervals.
