SUL-FE

greens grass, blackens moss...

A soluble (Iron Sulphate) powder for application as a liquid. Dilute Sul-Fe powder with water for application as a liquid, greening lawns without lush grass growth. It is easily applied using a knapsack sprayer or watering can with a sprinkler bar. Can blacken moss at higher rates. May stain hard standing areas

Mixing Instructions:

Pour Sul-Fe into permeable bag & place in knapsack/watering can. Fill a 1/3 full, agitate then top up to the required level.

Application Rates (to be mixed with water)

Season	Application Rate per m ²	Knapsack Dilution
Summer	0.5 - 1g	200 - 400g per 20lt of water
Winter	minimum 2g	minimum 800g per 20lt of water

UK / ROI Fertiliser Declaration

EC Fertiliser - Iron Fertiliser Sulphate of Iron

Iron (Fe) soluble in water	19%
