

MetaClear: a safe and controllable method to clean masonry from fungal disfigurations

- High adhesion gel for the sequestration of sodium hypochlorite
- Prevents evaporation during work
- Low odour
- Permanent concentration throughout the work
- Effective dwell time
- Enhanced detergency
- Stays at the surface where applied: No absorption into stone or render, no dribbling
- Suitable for vertical surfaces and overhanging masonry
- Reduces the risk of scuffing marks
- Effective rinsing on porous substrates
