

amvista

SPRAY DEFOAMER

Reduces & prevents foam buildup in spraying equipment

Add Amvista Spray Defoamer before or during spraying applications.

Amvista Spray Defoamer can save time and minimise overfilling accidents by preventing excess foam inside spraying equipment, commonly found with water-based spraying applications.

DIRECTIONS FOR USE:

- Half fill spray tank with water
 - Add Amvista Defoamer at a rate of 100ml per 500lt water
 - Add chemicals
 - Top up remaining water & agitate
-
- Can be added to spray tank during use.
 - Add to tank until foam diminishes
